

FITTING INSTRUCTIONS FOR: THE JENKS' BOLTS LOCKABLE FUEL CAP

Application

Jenks' Bolts Lockable Fuel Caps are suitable for all Triumph Bonneville versions from 2001 onwards, including the Bonneville, T100, Thruxton, Scrambler, America and Speedmaster. The caps also fit the Triumph "Legend" Series bikes, including the Thunderbird & Adventurer.

Replacing the stock cap on a
Bonneville America

Instructions.

Remove the standard fuel cap.

Fit the Locking cap, making sure the supplied sealing washer is properly seated. When tight there is a ratchet to prevent over tightening. With the proven "Jenks' Thumb Bolt" grip, just grip and tighten, it couldn't be simpler!

Turn the key: when locked the cap spins free from the tank and cannot be removed. For added security a range of keys are used, identified by a Letter/number code, eg: A01, stamped on the key. Please note that **spare keys are not available!**

On the Bonneville, T100, Thruxton, Scrambler & Legend series the cap sits a little higher than the stock cap: fitting a traditional cork washer (CPW 01), instead of the rubber one supplied, will lower the cap by 3mm. This washer is available from "Jenks Bolts" at a special price of £2.50, inc P&P, to purchasers of the locking fuel cap. To order simply return this leaflet with a cheque for £2.50 or phone for a Credit Card sale.
